# Defined Contribution Plan Processing System

---

The ISSI Defined Contribution Plan Processing System provides the features and functions required to successfully administer a Defined Contribution Pension Plan. The built-in flexibility of the system minimizes custom programming while meeting all the Fund's individual requirements. The system integrates with the Contribution Processing System, allowing immediate posting of contributions to the Participant's Defined Contribution Account, as well as accessibility for inquiry and report generation purposes. The system also provides complete Loan Processing capabilities for those Plans which offer Participants the ability to take a loan against their account balance.

## **Some features and functions of the Defined Contribution Plan Processing System Include:**

- **Automatic/Immediate Posting of Contributions to Participant Accounts**
- **Self-Directed Investment Plans**
- **Trial Distribution Analysis and Trial Interest Rate Analysis**
- **Automatic Disbursement of Interest/Earnings to Participant Accounts Based on Plan Rules**
- **Multi-Level Search Capability**
- **Complete Maintenance and Reporting Functions**
- **Printing Statements and/or Posting Current Balance Statements Online with ISSi-Site**
- **Production of Statements On-Demand** (Work History, Current Balance, Contributions...)
- **Printing of Checks and Registers**
- **Full Loan Processing**
- **General Field Comments**
