ISSI Laser Check Printing Solution (ISSi-Check)

The ISSI Laser Check Printing Solution (ISSi-Check) replaces preprinted check forms with electronically stored, digitized check overlays. The ISSI system prints all signatures, MICR numbers, and graphics onto blank security check stock in a seamless one-step process, enabling users to:

Features:

- Maintain multiple digitized check overlays with logos, Fund name, bank name and other pertinent check information
- Maintain multiple digitized signatures
- Electronically store digitized check forms and signatures using external media for secure storage and insertion into an adapter on the laser printer
- Eliminate the cost of preprinted check stock
- Eliminate bursting, decollating, and check signing machines
- Reduce personnel time associated with check production by eliminating the need to renumber/reset checks
- Reduce check fraud risk by eliminating pre-printed check stock in your office

Because ISSi-Check fully integrates with your existing ISSI system, you can reduce third party hardware, software, and support costs associated with other Laser MICR Check solutions.

For more information on ISSi-Check, please contact Andrew Devine at (856) 910-9190 ext. 429 or
