ISSi-Scan: ISSI's Imaging, Scanning, and Document Management Solution

ISSi-Scan provides a seamless interface between your ISSI Benefit Administration System and the Fund's scanned document archives, providing faster access to claims files, enrollment forms, and more. Electronic filing offers several advantages over maintaining paper records, including:

- **Increased Efficiency:** Files can be indexed and searched by multiple identifiers, making it easier to find the information you need on demand while working within the ISSI system.
- **Increased Accuracy:** View electronic versions of supporting documents that pertain directly to the data on-screen in your ISSI system.
- **Increased Security:** Unlike paper files, electronic documents can be encrypted and restricted by user access levels. In addition, with routine, off-site backups, such as those provided with ISSi-DCP, the electronic archives are invulnerable to environmental threats and office disasters.
- **Increased Office Space:** Electronic files can eliminate or reduce the number of cabinets or heavy storage boxes in the Fund Office.

ISSI has partnered with a leading Scanning and Document Management provider to develop a complete electronic file cabinet and digital document indexing system. ISSi-Scan can also interface with the Fund's existing document management system, giving users the ability to view scanned documents within the ISSI system.

For more information on ISSi-Scan, please contact Andrew Devine at (856) 910-9190 ext. 429 or ADevine@ISSIsystems.com.
