## The ISSI Union Administration System

The ISSI Union Administration System is designed to provide Union Locals detailed tracking and online administration of activities by Members, Employers, and other entities working with the Union. The system accurately maintains census and historical data necessary to professionally administer a Union. Member activities, from initiation into the Union to retirement, will be processed and tracked in a fast, accurate, thorough and orderly fashion. Functionality includes Dues Collection and Processing, the tracking and printing of Cash Receipts, Dues Delinquency Reporting and Letter Generation, Per-Capita Reporting, Hiring Hall / Dispatch Processing, and Certifications and Skills Tracking. The logical flow of the screens and menus is very intuitive, and the extensive availability of ad-hoc and pre-designed reports puts valuable information right at your fingertips.

The ISSI Union System features the latest version of the ISSI software, ISSI ULTRA. This platform employs state-of-the-art technology, providing such standard features as:

- Customizable screens
- Dynamic and interactive data grids
- Windows-like fonts and icons
- Split-screen support, touch-screen capability, and tablet compatibility
- Pull-down menus and push buttons
- Online help & documentation
- Attach documents of varying formats from individual users' workstations to many screens within the ISSI Ultra system, utilizing the "Attachments" feature
- Seamless interface with other productivity tools, such as MS Word, MS Excel, and Adobe PDF

The ISSI Union Administration System is architected so that it can be run either standalone or integrated with the ISSI Benefits Administration System. Clients utilizing the ISSI Benefits Administration system can run the Union System on a common hardware platform and exchange common information between systems.

For over thirty-five (38) years, ISSI has developed proven systems technology and maintained the largest install base in the industry. We have taken our know how, our many years of servicing Taft-Hartley Funds and Unions, and our proven software application expertise to design the most complete Software System available in the marketplace today.
